About me

Freelance Web3 Developer with a passion for **finance** and **blockchain** technology, specializing in blockchain, **EVM**, and **smart contracts**. Aside from that, I'm a **content creator** and **write** technical **articles** on my blog.

My expertise lies in developing robust and secure blockchain solutions, particularly within the realm of **decentralized finance (DeFi)**. I possess an extensive **portfolio** showcasing my proficiency in building innovative projects on the blockchain. Additionally, I am actively engaged in my own **open-source** initiative, contributing to the advancement of the blockchain ecosystem.

With experience as a **Smart Contract Engineer** within a blockchain protocol, I have gained valuable insights into creating efficient and reliable smart contracts. My deep understanding of blockchain technologies allows me to navigate complex challenges and deliver high-quality solutions.

Passionate about staying at the forefront of emerging trends, I am committed to continuous learning and expanding my knowledge in the ever-evolving world of web3 development. Eager to collaborate with like-minded professionals and contribute to groundbreaking blockchain ventures.

Experience +1 year

· **Solidity Developer Lead** at Koryntia   UK, London - Fully remote   june 2023 - now

Led team of developers and managed tasks, reviewed GitHub pull requests, and maintained repository for an innovative DeFi loan solution. Coordinated efforts, optimized code, and ensured adherence to best practices. Delivered timely solutions, deepening expertise in blockchain development and honing leadership skills.

· **Full Stack Developer** at Kudu Consultant   United States, Wyoming - Fully remote   june 2023 - now

Development of both frontend and backend for external projects. At the same time, building an innovative and capital-efficient AMM model.

· **Smart Contract Engineer** at Radxu   United State, Wyoming - Fully remote   feb 2023 - july 2023

Development, testing and maintenance of the smart contracts of https://app.radxu.org/ built with Solidity, Hardhat, Foundry, Typescript, node.js, ethers.js and Alchemy nodes, with integration with Slither for static analyzing of smart contracts. Responsible for design and development of the upcoming Radxu CSA and Radxu Staking. The application offerts variable and fixed income investment products in digital assets and RADX token staking.

· **Smart Contract Engineer** at Audicity   United State, Wyoming - Fully remote   feb 2023 - july 2023

Developed scripts to monitor Radxu protocol metrics and implemented administrative functionalities, while interacting with the Radxu protocol for administrative tasks, ensuring smooth operations. Utilized TypeScript and node.js to create efficient and reliable monitoring and administrative scripts.Leveraged MySQL for querying and filtering events from the blockchain and tracked users' staking positions for the frontend.

· **Freelance blockchain developer**   Self-employed - Fully remote   sep 2022 - feb 2023

Helped to build a smart contract protocol for a NFT collection community.

Education

· **Bachelor of Business Administration**   UPV University   september 2020 - now

· **Moralis Bootcamp**   Moralis Academy   february 2022 - june 2022

· **Online Courses and Certifications**   Udemy, Freecodecamp   february 2022 - now
